

I oppose any rule change which will make it easier for one person or entity to own more of the media in any market.

The airwaves are owned by the American public. It is our government's duty to promote their use in a manner that benefits the American people -- in this case to protect the free exchange of ideas and information. To accomplish this objective, it is necessary for government to prevent control of the media by a select few in what will fundamentally be a media monopoly. Please do not allow the FCC to violate its duty to the American public.

Respectfully,

Clarke D. Atwell
